Medical School coming to Centegra's Medical Campus in Huntley

Huntley, IL: Centegra has announced a partnership with [Rosalind Franklin University of Medicine and Science and the Chicago Medical School](#) to open a 30,000-square-foot regional campus within Centegra's 80,000 square foot Medical Office Building in Huntley (opening in March 2017).

According to statements made by Centegra's CEO, Michael Eesley, the university presence in Huntley will help attract quality physicians to the market. Earlier this year, Centegra launched a three-year internal medicine residency program with Rosalind Franklin University.

The program will begin in July 2016 at Centegra Hospital-McHenry where eight interns will be selected via the national match system. The residents will train to become hospitalists and primary care physicians and will have rotations both in the hospital and in outpatient clinics.

Training is provided by the Centegra medical staff with a core faculty consisting of both Centegra Physician Care and independent physicians. Eight additional graduates will be chosen for residencies with Centegra in 2017 and eight more in 2018.
